

ICT713 ADVANCED DATABASE DESIGN AND DEVELOPMENT T126

All information in the Subject Outline is correct at the time of approval. KOI reserves the right to make changes to the Subject Outline if they become necessary. Any changes require the approval of the KOI Academic Board and will be formally advised to those students who may be affected by email and via Moodle.

Information contained within this Subject Outline applies to students enrolled in the trimester as indicated

1. General Information

1.1 Administrative Details

Associated HE Award(s)	Duration	Level	Subject Coordinator
Master of Information Technology (MIT) Graduate Diploma of Information Technology (GDIT)	1 trimester	Postgraduate	Dr Divya Leekha divya.leekha@koi.edu.au P: +61 (2) 9283 3583 L: Level 7-11, 11 York St, Sydney. Consultation: via Moodle or by appointment.

1.2 Core/Elective

This subject is

- a core subject for the Master of Information Technology (MIT)
- a core subject for the Graduate Diploma of Information Technology (GDIT)

1.3 Subject Weighting

Indicated below is the weighting of this subject and the total course points.

Subject Credit Points	Total Course Credit Points
4	MIT (64 Credit Points); GDIT (32 Credit Points);

1.4 Student Workload

Indicated below is the expected student workload per week for this subject

No. Timetabled Hours/Week*	No. Personal Study Hours/Week**	Total Workload Hours/Week***
3 hours/week plus supplementary online material	7 hours/week	10 hours/week

* Total time spent per week at lectures and tutorials

** Total time students are expected to spend per week in studying, completing assignments, etc.

*** Combination of timetable hours and personal study

1.5 Mode of Delivery Classes will be face-to-face or hybrid. Certain classes will be online (e.g., special arrangements).

1.6 Pre-requisites Nil

1.7 General Study and Resource Requirements

- Students are expected to attend classes with the weekly worksheets and subject support material provided in Moodle. Students should read this material before coming to class to improve their ability to participate in the weekly activities
- Students will require access to the internet and their KOI email and should have basic skills in word processing software such as MS Word, spreadsheet software such as MS Excel and visual presentation software such as MS PowerPoint
- Computers and WIFI facilities are extensively available for student use throughout KOI. Students are encouraged to make use of the campus Library for reference materials.

Software resource requirements specific to this subject: MS Imagine, Office 365, SQL Server 2017.

1.8 Academic Advising

Academic advising is available to students throughout teaching periods including the exam weeks. As well as requesting help during scheduled class times, students have the following options:

- Consultation times: A list of consultation hours is provided on the homepage of Moodle where appointments can be booked.
- Subject coordinator: Subject coordinators are available for contact via email. The email address of the subject coordinator is provided at the top of this subject outline.
- Academic staff: Lecturers and Tutors provide their contact details in Moodle for the specific subject. In most cases, this will be via email. Some subjects may also provide a discussion forum where questions can be raised.
- Head of Program: The Head of Program is available to all students in the program if they need advice about their studies and KOI procedures.
- Vice President (Academic): The Vice President (Academic) will assist students to resolve complex issues (but may refer students to the relevant lecturers for detailed academic advice).

2. Academic Details

2.1 Overview of the Subject

This subject examines advanced areas of database design, implementation, and management. There is a strong emphasis on functional design and database implementation. Students will create and compare data and database design models with Entity Relationship Diagrams (ERDs) and Extended Entity Relationship Diagrams (EERDs). Strategies for data and database administration (DBA) for managerial, technical, and security roles are highlighted. The subject will also cover advanced topics including databases over the Internet, cloud data services, transaction management, database performance, distributed databases, business intelligence for decision making, big data, and NoSQL.

2.2 Graduate Attributes for Postgraduate Courses

Graduates of Postgraduate courses from King's Own Institute will achieve the graduate attributes expected from successful completion of a postgraduate degree under the Australian Qualifications Framework (2nd edition, January 2013). Graduates at this level will be able to apply advanced body of knowledge from their major area of study in a range of contexts for professional practice or scholarship and as a pathway for further learning.

King's Own Institute's generic graduate attributes for a master's level degree are summarised below:

	KOI Master's Degree Graduate Attributes	Detailed Description
	Knowledge	Current, comprehensive and coherent knowledge, including recent developments and applied research methods

	Critical Thinking	Critical thinking skills to identify and analyse current theories and developments and emerging trends in professional practice
	Communication	Communication and technical skills to analyse and theorise, contribute to professional practice or scholarship, and present ideas to a variety of audiences
	Research and Information Literacy	Cognitive and technical skills to access and evaluate information resources, justify research approaches and interpret theoretical propositions
	Creative Problem Solving Skills	Cognitive, technical and creative skills to investigate, analyse and synthesise complex information, concepts and theories, solve complex problems and apply established theories to situations in professional practice
	Ethical and Cultural Sensitivity	Appreciation and accountability for ethical principles, cultural sensitivity and social responsibility, both personally and professionally
	Leadership and Strategy	Initiative, leadership skills and ability to work professionally and collaboratively to achieve team objectives across a range of team roles Expertise in strategic thinking, developing and implementing business plans and decision making under uncertainty
	Professional Skills	High level personal autonomy, judgement, decision-making and accountability required to begin professional practice

Across the courses, these skills are developed progressively at three levels:

- **Level 1 Foundation** – Students learn the skills, theories and techniques of the subject and apply them in stand-alone contexts
- **Level 2 Intermediate** – Students further develop skills, theories and techniques of the subject and apply them in more complex contexts, beginning to integrate the application with other subjects.
- **Level 3 Advanced** – Students have a demonstrated ability to plan, research and apply the skills, theories and techniques of the subject in complex situations, integrating the subject content with a range of other subject disciplines within the context of the course.

Generally, skills gained from subjects in the Graduate Certificate and Graduate Diploma are at levels 1 and 2 while other subjects in the Master's degree are at level 3.

2.3 Subject Learning Outcomes

Listed below, are key knowledge and skills students are expected to attain by successfully completing this subject:

Subject Learning Outcomes	Contribution to Graduate Attributes
a) Model and design databases based on given requirements using ERDs and EERDs	     
b) Optimise querying, storing and indexing of databases	     
c) Articulate the trade-offs in using distributed databases and data warehousing	    

technologies	
d) Employ emerging trends in the field of database design and development	    

2.4 Subject Content and Structure

Below are details of the subject content and how it is structured, including specific topics covered in lectures and tutorials. Reading refers to the text unless otherwise indicated.

Weekly Planner:

Week (beginning)	Topic covered in each week's lecture	Reading(s)	Expected work as listed in Moodle
Week 1 02 March	Introduction and data models	Ch.2	Review questions on building blocks of data models and business rules. Formative not graded
Week 2 09 March	Advanced data modeling	Ch.5 and Appendix M	Review questions on Extended Entity Relationship models.
Week 3 16 March	Database design	Ch.9	Review questions on SDLC and DBLC.
Week 4 23 March	Transaction management and concurrency control	Ch.10	Review questions on transactions, ACIDS and locks.
Week 5 30 March	Database performance tuning and Advanced SQL and query optimisation	Ch.11	Review questions on transactions, ACIDS, and locks. Constraints, sub-queries, triggers, and sequence Assessment 1: Quiz
Week 6 07 April (Tue)	Database security and privacy	General Data Protection Regulation GDPR, Australia's Privacy Principles	Review questions on GDPR and APP related to databases.
Week 7 13 April	Distributed database management systems	Ch.12	Review questions on remote DBMS, DDBMS, remote and distributed transactions, and requests. Assessment 2: Database Project due

Week (beginning)	Topic covered in each week's lecture	Reading(s)	Expected work as listed in Moodle
Week 8 20 April	Business intelligence and data warehouses	Ch.13	Review questions on BI Decision-making, Architecture, Differentiation, Warehouse, Schemas, OLAP, Analytics, SQL, Visualization Assessment 2: Demo of Database Group Project will be conducted in workshop class.
Week 9 28 April (Tue)	Big data and NoSQL	Ch.14	Review questions on characteristics of Big data and NoSQL and HDFS.
Week 10 04 May	Database connectivity and web technologies	Ch. 15	Review questions on Connectivity, Technologies, Middleware, Services, XML, Cloud computing Assessment 3: Research report and pre-recorded Presentations
Week 11 11 May	Database administration	Ch.16	Review questions on Data quality, Decision-making, DBMS impact, DBA roles, Security framework, Standards, Cloud impact,
Week 12 18 May	Reflection and future	All chapters	Review questions on Key learnings, challenges faced, skill growth, real world applications and career pathways Assessment 4: Database Privacy and Ethics Report due by Tuesday 9am
Week 13 25 May	Study review week and Final Exam Week		
Week 14 01 June	Examinations Continuing students - enrolments for T226 open		Please see exam timetable for exam date, time and location
Week 15 09 June (Tue)	Student Vacation begins New students - enrolments for T226 open		
Week 16 15 June	- Results Released - Review of Grade Day for T126 – see Sections 2.6 and 3.2 below for relevant information. - Certification of Grades NOTE: More information about the dates will be provided at a later date through Moodle/KOI email.		
T226 29 June 2026			
Week 1 29 June	Week 1 of classes for T226		

2.5 Public Holiday Amendments

Please note: KOI is closed on all scheduled NSW Public Holidays.

T126 has Five (5) public holidays that occur during this trimester. Classes scheduled for these public holidays (Calendar Class Date) will be rescheduled as per the table below.

This applies to ALL subjects taught in T126.

Please see the table below and adjust your class timing as required. Please make sure you have arrangements in place to attend the rescheduled classes if applicable to your T126 enrolment.

Classes will be conducted at the same time and in the same location as your normally scheduled class except these classes will be held on the date shown below.

Calendar Class Date	Rescheduled Class Date
03 April 2026 (Friday) 04 April 2026 (Saturday) 06 April 2026 (Monday) 25 April 2026 (Saturday) 27 April 2026 (Monday)	25 May 2026 (Monday) 26 May 2026 (Tuesday) 27 May 2026 (Wednesday)

2.6 Review of Grade, Deferred Exams & Supplementary Exams/Assessments

Review of Grade:

There may be instances when you believe that your final grade in a subject does not accurately reflect your performance against the marking criteria. Section 8 of the *Assessment and Assessment Appeals Policy* (www.koi.edu.au) describes the grounds on which you may apply for a Review of Grade.

If you have a concern about your marks and you are unable to resolve it with the Academic staff concerned, then you can apply for a formal Review of Grade as explained in section 3.2(e) Appeals Process below. Please note the time limits for requesting a review. Please ensure you read the Review of Grade information before applying.

Review of Grade Day:

Final exam scripts will not normally be returned to students. Students can obtain feedback on their exam performance and their results for the whole subject at the Review of Grade Day. KOI will hold the Review of Grade Day for all subjects studied in T126. **The ROG day will be announced at a later date and the students will be notified through Moodle/KOI email.**

Only final exams and whole subject results will be discussed as all other assessments should have been reviewed during the trimester. Further information about Review of Grade Day will be available through Moodle.

If you fail one or more subjects and you wish to consider applying for a Review of Grade you are **STRONGLY ADVISED to** attend the Review of Grade Day. You will have the chance to discuss your final exam and subject result with your lecturer, and will be advised if you have valid reasons for applying for a Review of Grade (see Section 3.2 below and the *Assessment and Assessment Appeals Policy*).

A formal request for a review of grade may not be considered unless you first contact the subject coordinator to discuss the result.

Deferred Exams:

If you wish to apply for a deferred exam because you are unable to attend the scheduled exam, you should submit the Assignment Extension / Exam Deferment Form available by contacting academic@koi.edu.au as soon as possible, *but no later than three (3) working days of the assessment due date*.

If you miss your mid-trimester or final exam there is no guarantee you will be offered a deferred exam.

You must apply within the stated timeframe and satisfy the conditions for approval to be offered a deferred exam (see Section 8.1 of the *Assessment and Assessment Appeals Policy and the Application for Assignment Extension or Deferred Exam Forms*). In assessing your request for a deferred exam, KOI will take into account the information you provide, the severity of the event or circumstance, your performance on other items of assessment in the subject, class attendance and your history of previous applications for special consideration.

Deferred mid-trimester exams will be held before the end of week 9. Deferred final exams will be held on two days during week 1 or 2 in the next trimester. You will not normally be granted a deferred exam on the grounds that you mistook the time, date or place of an examination, or that you have made arrangements to be elsewhere at that time; for example, have booked plane tickets.

If you are offered a deferred exam, but do not attend *you will be awarded 0 marks for the exam*. This may mean it becomes difficult for you to pass the subject. If you apply for a deferred exam within the required time frame and satisfy the conditions you will be advised by email (to your KOI student email address) of the time and date for the deferred exam. Please ensure that you are available to take the exam at this time.

Marks awarded for the deferred exam will be the marks awarded for that item of assessment towards your final mark in the subject.

Supplementary Assessments (Exams and Assessments):

A supplementary assessment may be offered to students to provide a final opportunity to demonstrate successful achievement of the learning outcomes of a subject. *Supplementary assessments are only offered at the discretion of the Board of Examiners*. In considering whether or not to offer a supplementary assessment, KOI will take into account your performance on all the major assessment items in the subject, your attendance, participation and your history of any previous special considerations.

If you are offered a supplementary assessment, you will be advised by email to your *KOI student email address* of the time and due date for the supplementary assessment – supplementary exams will normally be held at the same time as deferred final exams during week 1 or week 2 of the next trimester.

You must pass the supplementary assessment to pass the subject. The maximum grade you can achieve in a subject based on a supplementary assessment is a PASS grade.

If you:

- are offered a supplementary assessment, but fail it;
- are offered a supplementary exam, but do not attend; or
- are offered a supplementary assessment but do not submit by the due date;

you will receive a FAIL grade for the subject.

Students are also eligible for a supplementary assessment for their final subject in a course where they fail the subject but have successfully completed all other subjects in the course. You must have completed all major assessment tasks for the subject and obtained a passing mark on at least one of the major assessment tasks to be eligible for a supplementary assessment.

If you believe you meet the criteria for a supplementary assessment for the final subject in your course, but have not received an offer, complete the *Complaint, Grievance, Appeal Form* and send your form to reception@koi.edu.au. The deadline for applying for supplementary assessment is the Friday of the first week of classes in the next trimester.

2.7 Teaching Methods/Strategies

Briefly described below are the teaching methods/strategies used in this subject:

- o *Lectures* (1 hours/week) are conducted in seminar style and address the subject content, provide motivation and context and draw on the students' experience and preparatory reading.
- o *Tutorials* (2 hours/week) include class discussion of case studies and research papers, practice sets and problem-solving and syndicate work on group projects. Tutorials often include group exercises and so contribute to the development of teamwork skills and cultural understanding. Tutorial participation is an essential component of the subject and contributes to the development of many of the graduate attributes (see section 2.2 above). Tutorial participation contributes towards the assessment in many subjects (see details in Section 3.1 for this subject). Supplementary tutorial material such as case studies, recommended readings, review questions etc. will be made available each week in Moodle.
- o *Online* teaching resources include class materials, readings, model answers to assignments and exercises and discussion boards. All online materials for this subject as provided by KOI will be found in the Moodle page for this subject. Students should access Moodle regularly as material may be updated at any time during the trimester
- o *Other contact* - academic staff may also contact students either via Moodle messaging, or via email to the email address provided to KOI on enrolment.

2.8 Student Assessment

Assessment is designed to encourage effective student learning and enable students to develop and demonstrate the skills and knowledge identified in the subject learning outcomes. Assessment tasks during the first half of the study period are usually intended to maximise the developmental function of assessment (formative assessment). These assessment tasks include weekly tutorial exercises (as indicated in the weekly planner) and low stakes graded assessments (as shown in the graded assessment table). The major assessment tasks where students demonstrate their knowledge and skills (summative assessment) generally occur later in the study period. These are the major graded assessment items shown in the graded assessment table.

Final grades are awarded by the Board of Examiners in accordance with KOI's Assessment and Assessment Appeals Policy. The definitions and guidelines for the awarding of final grades are:

- o *HD High distinction* (85-100%): an outstanding level of achievement in relation to the assessment process.
- o *D Distinction* (75-84%): a high level of achievement in relation to the assessment process.
- o *C Credit* (65-74%): a better than satisfactory level of achievement in relation to the assessment process.
- o *P Pass* (50-64%): a satisfactory level of achievement in relation to the assessment process.
- o *F Fail* (0-49%): an unsatisfactory level of achievement in relation to the assessment process.
- o *FW*: This grade will be assigned when a student did not submit any of the compulsory assessment items.

Provided below is a schedule of formal assessment tasks and major examinations for the subject.

Assessment Type	When Assessed	Weighting	Learning Outcomes Assessed
Assessment 1: Quiz	Week 5	20%	a
Assessment 2: Database Project - Group assessment (2000 words + 500 words)	Week 7 - Project Week 8 - Demonstrations	30% (Group work- 20% and Individual)	a, b

Assessment Type	When Assessed	Weighting	Learning Outcomes Assessed
		contribution log 10%)	
Assessment 3: Research Report and pre-recorded presentation - Individual assessment (2000 words)	Week 10	30%	c, d
Assessment 4: Database Privacy and Ethics- Individual assessment.	Due by Tuesday 9am Week 12	20%	a, b, c, d

Requirements to Pass the Subject:

To gain a pass or better in this subject, students must gain a *minimum of 50%* of the total available subject marks.

2.9 Prescribed and Recommended Readings

Provided below, in formal reference format, is a list of the prescribed and recommended readings.

Prescribed Text:

3. Assessment Details

3.1 Details of Each Assessment Item

The assessments for this subject are described below. The description includes the type of assessment, its purpose, weighting, due date and submission requirements, the topic of the assessment, details of the task and detailed marking criteria, including a marking rubric for essays, reports and presentations. Supplementary assessment information and assistance can be found in Moodle.

KOI expects students to submit their own work in both assignments and exams, or the work of their group in the case of group assignments. Material in assignments which comes from the work of others must be appropriately acknowledged.

Assessment 1

Assessment type: Quiz – Individual assessment.

Purpose: This assessment allows students to demonstrate their understanding of basic database design concepts, ERD/EERD theory, normalization, and team collaboration. It also helps prepare students for the upcoming group project. Students will have to answer scenario-based, short answer, ERD/normalization drawing, and reflection questions.

Value: 20%

Due date: Week 5 in workshop class

Submission: This quiz will be completed online via Moodle.

Assessment topic: Conceptual database design (Topics from Week 1 to Week 4) and team collaboration.

Task details:

The quiz will include scenario-based questions where students identify business rules, entities, or draw mini ERDs/EERDs. Students may also be asked to apply normalization rules to a simple table. Reflection questions will ask students to describe challenges and teamwork experiences in their group discussions. Students are expected to show reasoning, steps, and personal reflection.

Length: 50 minutes + 10 minutes reading and submission time during Week 5 workshop class.

Question	Fail (0–49%)	Pass (50–64%)	Credit (65–74%)	Distinction (75–84%)	High Distinction (85–100%)
Q1 – Content (Concepts, ERD, Normalization)- 12 marks	Limited or incorrect understanding of database concepts; reasoning missing or mostly incorrect.	Basic understanding; some reasoning shown, minor errors in concepts or ERD/normalization.	Clear understanding; mostly correct reasoning and concepts; minor omissions in ERD/normalization steps.	Very good understanding; strong reasoning; mostly accurate ERD/normalization; clear explanation.	Excellent understanding; fully correct ERD/normalization; reasoning is complete and clear; shows depth of knowledge.

Q2 Teamwork/Reflection- 8 marks	Minimal or generic reflection; no link to personal/group experience.	Some personal insight; limited relevance to team experience.	Shows understanding and some insight into group dynamics; reflection linked to teamwork.	Detailed and insightful reflection; clearly linked to group experience; shows problem-solving awareness.	Highly insightful, reflective, and critical; demonstrates deep understanding of teamwork and collaboration; personal experience clearly explained.
--	--	--	--	--	--

Assessment 2

Assessment type: Database Project - Group assessment (2000 words + 500 Individual contribution)

Purpose: This assessment allows students to analyse, design, implement, and manage a database according to a project scenario specification. This assessment part contributes to learning outcomes a and b. This assessment is worth 30% (Group work 20% and Individual contribution log with demonstration 10%)

Value: 30% Due date: Sunday midnight Week 7 (Project file) and In workshop class Week 8 (Demonstration)

Task details: During the second week workshop, the group is required to provide a project scenario to the tutor for approval. The tutor will review and approve the chosen topic before the students proceed with their work.

This task involves two components:

- Group work implementation and
- Individual contribution log.

Students will form groups of 2 to 3 members and create a project scenario to be approved by the tutor in the Week 2 workshop. The group will then analyse and determine the requirements for the client's business needs, and complete the data-level design for the database based on specific constraints and user view requirements. The group is expected to answer questions (a) through (h) in their report to fulfil the data-level design. Overall, the task includes group work, individual contribution log, project scenario approval, requirements analysis, and data-level design. This design requires addressing questions (a) through (h) in the group's report.

a) Business Rules: Based on the approved scenario's description of operations, identify and document the business rules. These rules should be properly written and used to define entities, attributes, relationships, or constraints.

b) Entities: Identify the entities mentioned in the operation description. There should be a minimum of 7 entities.

c) Software Platform Usage: Utilize Microsoft Access to identify the attributes and primary keys that accurately describe the entities. Create tables in Microsoft Access to represent these entities and indicate the primary keys.

d) Relationship Diagrams: Develop the structure of your database visually by creating an entity-relationship (E-R) diagram and EERD for the enterprise.

e) Normalization: Normalize the tables in your database design to eliminate duplicate records. Ensure that the tables are normalized up to the third normal form (3NF).

f) Data Population: Use Microsoft Access to create forms and populate data in the tables. Enter 5 records in each of the tables.

g) SQL Queries: Write 8 sample queries using Microsoft Access, out of which 6 should be based on joins.

h) Reports: Create reports in Microsoft Access based on the queries, and organize them according to the requirements.

Please note that the specific software platform mentioned in the original text is Microsoft Access, but it can be substituted with any other appropriate software platform as per the requirements of the task. Always follow the guidelines and instructions provided by your tutor.

Following are some topics which can be considered but not limited to:

1. Emergency Shelter and Relief Supply Coordination Database
2. Renewable Energy Production and Storage Monitoring Database
3. Digital Identity and Access Control Management Database
4. Clinic Appointment Scheduling and Medical Equipment Tracking Database
5. Public Transport Scheduling and Passenger Flow Analysis Database
6. Employee Training, Certification, and Skills Tracking Database
7. Financial Credit Scoring and Loan Approval Support Database
8. Smart Home Sensor Data and Automation Log Database
9. Rental Housing Applications and Tenant Maintenance Request Database
10. Water Quality Testing and Environmental Compliance Database
11. Student Wellbeing, Counselling, and Support Services Database

Individual contribution log:

Students are required to maintain an individual contribution log for this group project. This log will document your specific contributions to the project and reflect on your roles and responsibilities throughout the project timeline. Part C of the tutorial activities from Week 1 to Week 7 will be used by the lecturer to monitor progress and will form part of the assessment and marking process of the Individual contribution log.

Submission requirements details:

The group leader is responsible for submitting the group work report, while each individual student is required to submit their own individual contribution log report. Both components must be submitted no later than midnight on Sunday of Week 7. Demonstrations are scheduled to take place during the workshop class in Week 8. Students need to provide demonstrations in class face to face.

Submission (Week 7):

Students are required to submit a comprehensive individual contribution log that includes a summary of your contributions up to that point. This log should provide the logistics of the tasks you have completed, your role in the project, and any challenges or insights you have encountered. Refer to the marking criteria of Individual Contribution log before submitting this log file.

Marking Rubric for Assessment: 2; Group Contribution: Value: 20%

Criteria	Fail (0 – 49%)	Pass (50 – 64%)	Credit (65 – 74%)	Distinction (75 – 84%)	High Distinction (85 – 100%)
Structure and Format 3 marks	Very difficult to read, unclear structure and most of the required sections are missing	Some difficulty in reading, not very clear structure but important sections are included	Clear and readable, and all required sections are included.	Well written and very clear, and all required sections with completed discussion are included.	Well written and very clear, all required sections with completed discussion are included and additional sections have been added for clarity.
Introduction 5 marks	No introduction and requirements are given or most of the requirements are irrelevant.	Introduction and requirements of the business case are provided with some details and limited cohesion.	Introduction and requirements of the business case are provided with most of the required details in a cohesive manner.	Introduction and requirements of the business case are provided with all the required details in a comprehensive and cohesive manner.	Introduction and requirements of the business case are provided with all details presented systematically in a comprehensive and cohesive manner
Database design 10 marks	No logical design is provided, or the design is irrelevant	Some of the entities and relations of the ER and EER diagram are converted to normalized relations.	Many of the entities and relations of the ER and EER diagram are converted to normalized relations	Nearly all the entities and relations of the ER and EER diagram are converted to normalized relations.	All the entities and relations of the ER and EER diagram are converted to normalized relations.
References 2 marks	No references	References are provided but not in the correct format on several occasions	References are provided and have mostly correct	References are provided in the correct format but minor issues with in-text citations	Well-organised references and no issues with in-text citations.
Total Mark: / 20 marks	COMMENTS:				

Marking Rubric for Assessment: 2; Individual contribution log

Value: 10%

Criteria	Fail (0 – 49%)	Pass (50 – 64%)	Credit (65 – 74%)	Distinction (75 – 84%)	High Distinction (85 – 100%)
Attendance at weekly meetings 0.5 mark	Attended less than 50% of the meetings	Attended less than 65% of the meetings	Attended less than 75% of the meetings	Attended less than 85% of the meetings	Attended 85% or more of the meetings
Weekly activity log 0.5 mark	Provided less than 50% of the weekly logs and/or provided scant details	Provided less than 65% of the weekly logs and/or provided incomplete details	Provided less than 75% of the weekly logs and/or provided only basic details	Provided less than 75% of the weekly logs and/or provided most required details	Provided less than 75% of the weekly logs and/or provided comprehensive details
Time management 0.5 mark	Assigned tasks typically late or not completed	Most assigned tasks completed by the deadline	All assigned tasks completed by the deadline	Most assigned tasks completed well in advance of deadline allowing time for revision and refinement	All assigned tasks completed well in advance of deadline allowing time for revision and refinement
Tasks 0.5 mark	Did not complete the tasks assigned	Completed most assigned tasks but not thorough and lacking details	Completed most assigned tasks in detail	Completed all assigned tasks in detail	Completed all tasks assigned at a professional level
Actual contribution to group project 1 mark	Made little or no contribution to the project/report	Made a cursory contribution to the project/report	Made a fair contribution to the project/report	Made a significant contribution to the project/report	Made a vital contribution to the project/report
Reflection 2 marks	Has not been able to provide any of the following: • Discuss your experience of working in a group. • Mention any challenges/difficulties that you have faced in accomplishing the group project. • Comment on any limitations/strength of your design. • Comment on whether your database meets all the system requirements as specified.	Has been able to provide just one of the following: • Discuss your experience of working in a group. • Mention any challenges/difficulties that you have faced in accomplishing the group project. • Comment on any limitations/strength of your design. • Comment on whether your database meets all the system requirements as specified.	Has been able to provide just any two of the following: • Discuss your experience of working in a group. • Mention any challenges/difficulties that you have faced in accomplishing the group project. • Comment on any limitations/strength of your design. • Comment on whether your database meets all the system requirements as specified.	Has been able to provide only any three of the following: • Discuss your experience of working in a group. • Mention any challenges/difficulties that you have faced in accomplishing the group project. • Comment on any limitations/strength of your design. • Comment on whether your database meets all the system requirements as specified.	Has been able to provide all the following: • Discuss your experience of working in a group. • Mention any challenges/difficulties that you have faced in accomplishing the group project. • Comment on any limitations/strength of your design. • Comment on whether your database meets all the system requirements as specified.

	• Mention any assumptions made	• Mention any assumptions made.	• Mention any assumptions made.	• Mention any assumptions made.	• Mention any assumptions made.
Demonstration 5 marks	No implementation shown during the demo or mostly irrelevant implementation shown and no screenshots are provided in the report.	Some of the implementation and management database tasks are completed and shown during the demo and relevant screenshots are provided in the report.	Many of the implementation and management database tasks are completed and shown during the demo and relevant screenshots are provided in the report.	Nearly all the implementation and management database tasks are completed and shown during the demo and relevant screenshots are provided in the report.	All the implementation and management database tasks are completed and shown during the demo and relevant screenshots are provided in the report.

Assessment 3

Assessment type: Research report with presentation - individual assessment (2000 words)

Purpose:

The research report assessment serves as a means to gauge the depth of students' knowledge, analytical skills, and their ability to incorporate evolving trends into the design and development of databases. Through this assessment, students will have the opportunity to demonstrate their understanding of the complexities and considerations involved in utilizing emerging database technologies. They are expected to critically examine trade-offs, such as performance, scalability, and fault tolerance, while also showcasing their awareness and application of emerging trends that influence contemporary practices in the field of database design and development. This research report helps check how well students understand advanced database concepts, how they think and analyze, and how they can apply new trends in database design and development. In this task, students will show their understanding of the challenges and important factors involved in using new types of database technologies. They should carefully look at the pros and cons of different approaches—like how well they perform, how easily they can grow with the system, and how they fit with business needs. This assessment part contributes to learning outcomes c and d.

Value: 30%

Due Date: Week 10 Sunday midnight

Task Details:

This is an individual assessment. Each student will research on any two emerging trends in the field of database technologies for their topic approved in Assessment 2. At least five recent research titles (Journal articles and conference papers) should be reviewed. The advanced algorithms/applications of data management should be selected and discussed. The report will include problems, trade-offs, strengths, weaknesses, and the details of the proposed technical solution according to the requirements of their case study. Students will provide a written report with at least the following sections:

- Introduction: background of the case study.
- Database issues: discuss the details and priorities of the database issues related to the case study.
- Propose solutions: based on the literature review for both theoretical and practical perspectives, propose solutions to the identified issues
- Conclusion: provide a complete summary of the report and recommendations

Students are required to prepare no more than 5 presentation slides and pre-record their presentation. The recording link must be included on the final page of the report.

Submission requirements details:

In Workshop 7, the student is required to provide two emerging database technologies as the foundation for their research. The tutor will review and approve these technologies before the student advances with their report. Furthermore, students need to submit their pre-recorded presentation link (not more than 5 minutes) on the last page of the Word report. The finalized research report must be submitted by midnight on Sunday of Week 10.

Marking Rubric for Assessment: 3: Research report Individual assessment

Value: 30%

Criteria	Fail (0 – 49%)	Pass (50 – 64%)	Credit (65 – 74%)	Distinction (75 – 84%)	High Distinction (85 – 100%)
Structure and format 2 marks	Very difficult to read, unclear structure, and most of the required sections are missing	Some difficulty in reading, not very clear, but important sections are included	Clear and readable, and all required sections are included	Well written and very clear, and all required sections with completed discussion are included	Well written and very clear, all required sections with completed discussion are included, and additional sections have been added for clarity
Introduction 2 marks	No introduction and requirements are given or most of the requirements are irrelevant	Introduction and requirements of the business case are provided with some details and limited cohesion	Introduction and requirements of a business case are provided with most of the required details in cohesive manner	Introduction and requirements of the business case are provided with all of the required details in comprehensive and cohesive manner	Introduction and requirements of a business case are provided with all details presented systematically in a comprehensive and cohesive manner
Database issues 4 marks	No issues analysed and discussed, or irrelevant issues given	Some basic issues are identified but not the most critical ones, provides irrelevant supportive arguments	Some critical issues are identified but not all, provides partially supportive arguments	Critical issues are identified, provides supportive arguments	All critical issues are identified, provides exceptional supportive arguments with additional discussion
Proposed solution 7 marks	No solution provided or completely irrelevant solution given, no support for the position taken in the solution, or the wrong argument is given	Some solution is provided but not the most effective, provides biased/irrelevant support for the position taken in the solution	Effective solution is provided with limited details and ambiguous relevance, provides basic level of support for the position taken in the solution	Effective and relevant solution is provided with required details, provides good level of support for the position taken in the solution	Effective and relevant solution is provided that gives additional insights and theoretical perspectives, provides exceptional level of support for the position taken in the solution

Evidence and depth of research 3 marks	Inaccurate, inappropriate or no use of literature, analysis not developed, few original explanations provided	Sound selection of theory from a range of sources to build and adequately justify analysis, paraphrasing used throughout but accompanied by original explanations	Insightful and appropriate selection of theory from a good range of current and relevant sources to systematically build and justify analysis, minimal paraphrasing	Integration and originality in the selection and handling of relevant theory to build and justify analysis, wide range of current and relevant sources integrated in a systematic way	Outstanding Integration and originality in the selections of relevant theory to build and justify analysis, appropriate theory from a broad related range of current and relevant sources to systematically build and justify analysis
Conclusion 2 marks	No conclusion or lack of cohesion with the discussion, no or limited recommendations provided	Conclusion does not link back systematically to most sections, some basic recommendations provided	Conclusion links back to some sections of the report, some detailed recommendations provided	Conclusion links back to all sections of the report, detailed recommendations provided	Conclusion demonstrates a deep understanding of the proposed solution and relates back to all sections of the report, detailed recommendations provided
Pre-recorded presentation 10 marks	No recording submitted or presentation does not explain the report; narration unclear; slides missing or confusing; technical problems make it hard to follow.	Recording submitted but summary is poor; narration weak or hard to understand; slides or visuals unclear; minor technical problems.	Summary is adequate; narration mostly clear; slides mostly relevant and easy to follow; minor technical issues.	Clear and concise summary; narration clear and easy to follow; slides relevant and well-integrated; good technical quality.	Excellent and complete summary; narration clear, confident, and easy to understand; slides very clear, creative, and enhance understanding; excellent technical quality throughout.

Assessment 4

Assessment Type: Database Privacy and Ethics Assessment (Individual assessment)

Purpose: This assessment aims to evaluate students' ability to integrate privacy, ethical, and security principles (GDPR and APP) with emerging database technologies, demonstrating their understanding of database design and development trends in alignment with real-world regulatory and ethical standards. This assessment contributes specifically to learning outcomes a, b, c and d.

Value: 20%

Due Date: Week 12 Tuesday 9 am

Task Details:

Students will analyse their database created in Assessment 2 and enhance it to align with GDPR and APP principles. They will incorporate the two emerging database trends identified in Assessment 3 to improve compliance and system capabilities. Students will incorporate following sections in their Word report:

Section 1: Existing System Analysis (4 Marks)

In this section, students will provide a concise overview of the database they created in Assessment 2. Describe its purpose, the types of data it manages, and its main features. Identify any potential gaps in the database related to privacy, security, and ethical compliance. For instance, consider whether the database adheres to data protection regulations like GDPR or APP, whether sensitive data is adequately protected, and if the system provides sufficient transparency or controls for user privacy. This analysis will serve as the foundation for your proposed improvements in the further sections.

Section 2: Proposed Alignment with GDPR and APP (10 Marks)

Here, students will outline the necessary modifications to make the database compliant with GDPR (General Data Protection Regulation) and APP (Australian Privacy Principles). This may include implementing features. Additionally, students will explain how they have applied APP (Australian Privacy Principles).

Section 3: Integration of Emerging Trends (6 Marks)

In this section, students will propose how the two emerging database trends can be integrated into their existing database. The integration of the emerging trend should be aligned with GDPR, and APP requirements. Justify how the trend can improve system performance and ensure ongoing compliance with privacy and security regulations.

Marking Rubric for Assessment: 4: Database Privacy and Ethics Assessment

Value: 20%

Criteria	Fail (0 – 49%)	Pass (50 – 64%)	Credit (65 – 74%)	Distinction (75 – 84%)	High Distinction (85 – 100%)
Section 1: Existing System Analysis (4 marks)	Incomplete or unclear overview of the database (0-2 Marks). Lacks critical analysis of gaps in compliance (0-2 Marks).	Clear overview with some gaps in analysis. Limited identification of compliance issues (2-3 Marks).	Clear, detailed overview with some analysis of gaps. Basic identification of compliance issues (3-4 Marks).	Detailed and well-structured overview. Clear identification of gaps in privacy, security, and ethical compliance (4 Marks).	Comprehensive and insightful overview with a thorough analysis of gaps in privacy, security, and compliance (5 Marks).
Section 2: Proposed Alignment with GDPR and APP (10 marks)	Vague or no explanation of GDPR and APP compliance (0-3 Marks). Few or incorrect modifications proposed (0-3 Marks).	Basic explanation with some understanding of GDPR and APP. Modifications are somewhat relevant (4-7 Marks).	Good explanation of modifications. Clear application of GDPR and APP principles (8-9 Marks).	Strong explanation with clear, detailed modifications showing deep understanding of GDPR and APP compliance (10-11 Marks).	Excellent, thorough explanation of all modifications. Highly detailed and comprehensive application of GDPR and APP (12 Marks).
Section 3: Integration of Emerging Trends (6 marks)	Lacks clear explanation or integration of emerging trends. No alignment with compliance principles (0-2 Marks).	Basic proposal with limited explanation of the emerging trend. Minimal connection to GDPR and APP (3-4 Marks).	Good explanation of the emerging trend. Clear alignment with GDPR and APP though limited in scope (4-5 Marks).	Strong proposal with detailed explanation of how the emerging trend is integrated and aligned with GDPR and APP principles (5 Marks).	Excellent proposal with in-depth analysis and clear, compelling alignment with GDPR and APP principles (5 Marks).
Total Mark: 20 marks	COMMENTS:				

3.2 General information about assessment

a) Late Penalties and Extensions

An important part of business life and key to achieving KOI's graduate outcome of Professional Skills is the ability to manage workloads and meet deadlines. Completing assessment tasks on time is a good way to master these habits.

Students who miss mid-trimester tests and final exams without a valid and accepted reason may not be granted a deferred exam and will be awarded 0 marks for the assessment item. Assessment items which are missed or submitted after the due date/time will attract a penalty unless there is a compelling reason (see below). These penalties are designed to encourage students to develop good time management practices, and to create equity for all students.

Any penalties applied will only be up to the maximum marks available for the specific piece of assessment attracting the penalty.

Late penalties, granting of extensions and deferred exams are based on the following:

In Class Tests and Quizzes (excluding Mid-Trimester Tests)

- Generally, extensions are not permitted. A make-up test may only be permitted under very special circumstances where acceptable supporting evidence of illness, hardship or unavoidable problems preventing completion of the assessment is provided (see section (b) below). The procedures and

timing to apply for a make-up test (only if available) are as shown in the section *Applying for an Extension* (see below).

- Missing a class test will result in 0 marks for that assessment item unless the above applies.

Written Assessments and Video Assessments

- There is a late penalty of *5% of the total available marks* per calendar day unless an extension is approved (see *Applying for an Extension* section below).

Presentations

- Generally, extensions are not permitted. Missing a presentation will result in 0 marks for that assessment item. The rules for make-up presentations are the same as for missing in-class tests (described above).

For group presentations, if serious circumstances prevent some members of the group from participating, the members of the group who are present should make their contributions as agreed. If a make-up presentation is approved, the other members of the group will be able to make their individual presentation later and will be marked according to the marking rubric. A video presentation may be used to facilitate the process.

Mid-Trimester Tests and Final Exams

If students are unable to attend mid-trimester tests or final exams due to illness, hardship or some other unavoidable problem (acceptable to KOI), they must:

- Complete the Assignment Extension / Exam Deferment Form available by contacting academic@koi.edu.au as soon as possible, *but no later than three (3) working days after the exam date*.
- Provide acceptable documentary evidence (see section (b) below).
- Agree to attend the deferred exam as set by KOI if a deferred exam is approved.

Deferred exam

- There will only be one deferred exam offered.
- Marks obtained for the deferred exam will be the marks awarded for that assessment item.
- If you miss the deferred exam you will be awarded 0 marks for the assessment item. This may mean you are unable to pass the subject.

b) Applying for an Extension

If students are unable to submit or attend an assessment when due, they must

- Complete the Assignment Extension / Exam Deferment Form available by contacting academic@koi.edu.au as soon as possible, *but no later than three (3) working days of the assessment due date*.
- Provide acceptable documentary evidence in the form of a medical certificate, police report or some other appropriate evidence of illness or hardship, or a technician's report on problems with computer or communications technology, or a signed and witnessed statutory declaration explaining the circumstances.
- Students and lecturers / tutors will be advised of the outcome of the extension request as soon as practicable.

Please remember there is no guarantee of an extension being granted, and poor organisation is not a satisfactory reason to be granted an extension.

c) Referencing and Plagiarism

Please remember that all sources used in assessment tasks must be suitably referenced.

Failure to acknowledge sources is plagiarism, and as such is a very serious academic issue. Students plagiarising run the risk of severe penalties ranging from a reduction in marks through to 0 marks for a first offence for a single assessment task, to exclusion from KOI in the most serious repeat cases. Exclusion has serious visa implications. The easiest way to avoid plagiarising is to reference all sources.

Harvard referencing is the required method – in-text referencing using Author's Surname (family name) and year of publication. A Referencing Guide, "Harvard Referencing", and a Referencing Tutorial can be found on the right-hand menu strip in Moodle on all subject pages.

An effective way to reference correctly is to use *Microsoft Word's* referencing function (please note that other versions and programs are likely to be different). To use the referencing function, click on the References Tab in the menu ribbon – students should choose *Harvard*.

Authorship is also an issue under plagiarism – KOI expects students to submit their own original work in both assessment and exams, or the original work of their group in the case of a group project. All students agree to a statement of authorship when submitting assessments online via Moodle, stating that the work submitted is their own original work.

The following are examples of academic misconduct and can attract severe penalties:

- Handing in work created by someone else (without acknowledgement), whether copied from another student, written by someone else, or from any published or electronic source, is fraud, and falls under the general Plagiarism guidelines.
- Copying / cheating in tests and exams is academic misconduct. Such incidents will be treated just as seriously as other forms of plagiarism.
- Students who willingly allow another student to copy their work in any assessment may be considered to assisting in copying/cheating, and similar penalties may be applied.

Where a subject coordinator considers that a student might have engaged in academic misconduct, KOI may require the student to undertake an additional oral exam as a part of the assessment for the subject, as a way of testing the student's understanding of their work.

Further information can be found on the KOI website.

d) Reasonable Adjustment

The Commonwealth Disability Discrimination Act (1992) makes it unlawful to treat people with a disability less fairly than people without a disability. In the context of this subject, the principle of Reasonable Adjustment is applied to ensure that participants with a disability have equitable access to all aspects of the learning for the subject. For assessment, this means that barriers to their demonstrating competence are removed wherever it is reasonably practical to do so.

Examples of reasonable adjustment in assessment may include:

- provision of an oral assessment, rather than a written assessment
- provision of extra time
- use of adaptive technology.

The focus of the adjusted assessment should be on enabling the student to demonstrate achievement of the learning outcomes for the subject, rather than on the method of assessment.

e) Appeals Process

Full details of the KOI *Assessment and Assessment Appeals Policy* may be obtained in hard copy from the Library, and on the KOI website www.koi.edu.au under *Policies and Forms*.

Assessments and Mid-Trimester Exams:

Where students are not satisfied with the results of an assessment, including mid-trimester exams, they have the right to appeal. The process is as follows:

- Discuss the assessment with their tutor or lecturer – students should identify where they feel more marks should have been awarded – students should provide valid reasons based on the marking guide provided for the assessment. Reasons such as “*I worked really hard*” are not considered valid.
- If still not satisfied, students should complete an Application for Review of Assessment Marks form, clearly explaining the reasons for seeking a review. This form is available from the KOI website under *Policies and Forms* and is also available at KOI Reception (Level 9, 11 York Street). The completed Application for Review of Assessment Marks form should be submitted as explained on the form with supporting evidence attached to academic@koi.edu.au .
- The form must be submitted within *ten (10) working days* of the return of the marked assessment, or within *five (5) working days* after the return of the assessment if the assessment is returned after the end of the trimester.

Review of Grade – whole of subject and final exams:

Where students are not satisfied with the results of the whole subject or with their final exam results, they have the right to request a Review of Grade – see the *Assessment and Assessment Appeals Policy* for more information.

An *Application for Review of Grade/Assessment Form* (available from the KOI Website under *Policies and Forms* and from KOI Reception at (Level 9, 11 York Street) should be completed clearly explaining the grounds for the application. The completed application should be submitted as explained on the form, with supporting evidence attached to academic@koi.edu.au .
